

Roof Mounted Centrifugal TEFC Fans – Vertical Discharge

Application

- Designed for roof installations, up to a maximum pitch of 15 degrees, they are suitable for a wide range of ventilation applications including domestic, industrial and commercial requiring small to large air volumes and medium to high pressures.

Design

- Galvanised steel base and powder coated cowl. Larger sizes have a galvanised steel base and UV stabilised cowl.

Motor

- TEFC type available only in 415V three phase with four, six and eight pole options. Motors are speed controllable using variable frequency control.
- Options include 2 speed motors and motors comply with Exe, Exd, Exn etc. Standards.

Protection

- Standard motors are rated to IP55. Higher levels of protection are available.

Impeller

- High efficiency backward curved impeller.

Technical Data & Specification
